In table H4.2-1, the detected concentration range for TCDD TEQ are 0.000455 - 0.723 J pg/g. However, the bin table for Upriver detected shows 3 samples in bin 1-10. Further the total number of detects in the bin table is 45 but table H4.2-1 says 26. Could you explain the discrepancy? Which is correct?
